

Iwate International Association

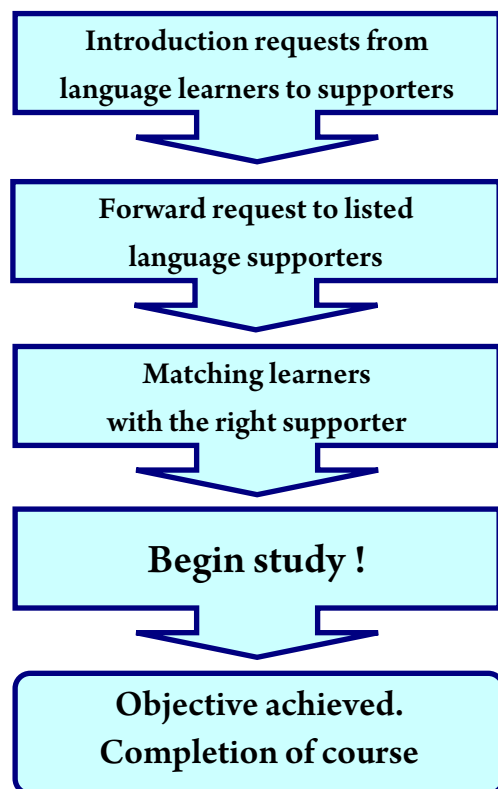

Want to study Japanese?

★ Program Contents

At Iwate International Association, we have a number of Japanese language supporters listed in our records who have experience teaching Japanese, have a Japanese teaching certificate or have attended seminars related to Japanese language education.

We are able to offer lessons on a once per week basis to foreigners who would like to receive language instruction in Japanese. Lessons are free although any necessary expenses connected with your Japanese study will be your responsibility to pay.

★ Outline of the procedure from application to taking lessons

... Fill out a Japanese language supporter introduction request form.

(You can either pick up a form at Iwate International Association or receive one by E-mail. Contact details are given below.)

... Iwate International Association look for and contact language supporters who fit with the requests of the learner.

... Supporters and learners meet at a date and time that is convenient for both of them and discuss the needs of the learner and appropriate course of study.

Caution: Supporters are taking time out of their own schedules for the benefit of language learners. In the instance that you are unable to attend your lesson, please contact your instructor/International Center by 3pm at the latest the day before. Last minute cancellations on the day are waste of supporter's money and time. Iwate International Association categorically refuses to reintroduce any learners who make last minute cancellations.
