

For organizations interested in home stay and home visit programs

The association acts as an intermediary and provides support for our volunteers who are registered as host families, and foreigners who would like to interact with Japanese people through everyday life experiences.

1. Introduction

- Upon receiving a request from the organization, the association will match the organization with registered host families (Form 3 and 4).
- Once a match is established, the association will introduce the host family to the organization. The association will also provide information that the host family would like the visitor to know (Family structure and rules, etc).

2. Honorarium

The host family will be recruited given the understanding that the remuneration amount will be decided by the organization. The organization shall make payment directly to the host family.

3. Follow-up system

Under the circumstance that the organization does not conduct a feedback survey, the association will ask the host family and home stay participant for their feedback on ways to improve the program.

In addition, if the host family has any requests regarding the visitor during his/her stay, the association will relay this information to the organization in order to allow both parties to interact amicably for the remainder of the program.

4. Application method

Please submit these documents at least one month before your desired home stay/visit period.

- ① Home stay request form (Form 2)
- ② Home stay visitor profile (Form 3)
 - ※Include a photo.
 - ※The document may be submitted in any preferred format given that all requested information is included.
 - ※When a match has been found, the visitor's country of birth, gender, age, and affiliations may be revealed to the host family.
- ③ Copy of the commitment form, overseas insurance, etc. (In the case that the home family requests any necessary forms)
