Detailed description: An infographic explaining the Disaster Message Dial 171 service. It includes a phone icon and a title. The 'Usage Method' section is divided into 'Recording Method' (録音方法) and 'Playback Method' (再生方法). Both methods start with dialing 171, followed by a guidance message. For recording, pressing 1 is required, while for playback, pressing 2 is required. Both methods also include a guidance message. At the bottom of each method, instructions specify that disaster-affected areas should use their home phone numbers, while non-affected areas should use the disaster-affected area's phone numbers, including the area code. The number format is shown as (XXX) XXXX XXXX.
